Continuation Sheet (PTO-303)

Application No. 09/081,872

Continuation of 2. NOTE: Newly proposed claims 77 and 78 incorporate subject matter in ways that were not previously present in the claims and require further consideration and search. The subject material of claim 77, data that is symmetrically encrypted is either a message digest or signature, was not previously claimed with subject matter in the independent claim (76) from which it depends, using a globally unique identifier as a seed for a key. Similarly subject material of claim 78, data submitted is based at least in part on form input, was not previously claimed with subject matter in independent claim 76 from which it depends. Also, claims 56-62, 65-67, and 69-75 are still extant, and no arguments have been presented as to their patentability.
